SUBJECT: [REDACTED] Code Call System

25X1A
REF : A. [REDACTED] dtd 25 June 1970
B. SCD 70-1848 dtd 13 November 1970

25X1A

1. Your suggestions and critique in Reference A have resulted in the Reference B modifications to the [REDACTED] system. These modifications include the detailed solutions you proposed. In addition to your suggestions, an inhibit circuit has been added to the code generator to eliminate false triggering of the system during momentary power fluctuations. The new instruction manual, which you will receive under the Reference B exchange program, will reflect all the above mentioned modifications.

2. The comments on [REDACTED] were well taken, and will result in a revision of [REDACTED] in the near future. 25X1A

3. Please express our appreciation to your technicians for bringing these problems to our attention. Well thought out suggestions such as yours are instrumental in the successful introduction of new equipment to the system.
